

TO: South Dakota Educators
FROM: Nancy Hiller, Aeronautics Program Assistant
DATE: October 19, 2022
SUBJECT: 2023 International Aviation Art Contest

A child's imagination is always an amazing thing. When you combine aviation, art and that imagination, wonderful things can happen. We at the South Dakota Department of Transportation and the South Dakota Pilots Association are seeking students who can combine those things into a work of art.

We want to motivate and encourage children of all ages to become more familiar with and participate in aeronautics, engineering, and science. This art contest could be the beginning of a child's passion for aviation! Please review the enclosed brochure and consider having your students participate in the contest. Feel free to make as many copies of the 'Certificate of Authenticity' as you need.

Our office will be judging the submissions and prizes will be awarded to the 1st - 3rd place winners in each age category. The top three place winners in each age group will be forwarded to Washington D.C. to participate in the national competition. Last year, one of the winners in the senior category went on to win 2nd place in the national competition!

As noted in the enclosed brochure, **all entries must be received by January 10, 2023.**

Mail all entries to:
SD Department of Transportation
Office of Air, Rail & Transit
700 East Broadway Avenue
Pierre, SD 57501-2586

2023 Aviation Art Competition

THE 2023 THEME:

AIR SPORTS & THE ENVIRONMENT

The sense of liberty that pilots and skydivers feel when flying through the skies often comes hand-in-hand with a deep appreciation of the blue and green planet below. The beauty and fragility of our earth is simply more evident when viewed from above.

Aviation has always been at the forefront of technology and over the generations, those involved in aeronautics have felt an ever-increasing pressure to protect our planet. Aviators, now and in the future, have a responsibility to push forward the limits of human innovation and imagination to harness cleaner energy and minimize the impact of air sports on the earth and its atmosphere.

By letting your imagination fly, we want you, as a young artist, to explore the ways that air sports can interact harmoniously with our environment. Ask yourself, how can air sports help inspire others to protect our earth? Can you envisage how innovation and technology can use greener fuels to power aircraft? Can the natural wonders of the earth inspire the aviation of the future? How could aviation be involved in reducing, reusing and recycling?

Artists often take the lead in imagining a brighter future. It's time to take your favorite art materials and try to conjure up a vision of how air sports of the future can help to keep our planet safe for the generations to come.

The FAI is particularly concerned with all forms of sporting and recreational aviation, including:

- Ballooning
- Gliding
- Parachuting
- Aerobatics
- Hang-Gliding and Para-gliding
- Microlight/Ultralight Flying
- Model Aircraft
- Light Aircraft
- Helicopter Flying
- Space World Records
